

Juicebox lite 1.5.0

FREE program that I use slideshows with thumbnails at bottom (juicebox_lite_1.5.0)

Its only two or three steps to download & try it
Make your slideshow on your computer & then upload the folder to website host (of course keeping the same folder name each time)

***** Note Chrome, Opera and IE 10+ will not preview Juicebox from the desktop. Firefox or Safari browsers will preview locally *****

////////////////////////////////////

Getting Started

Juicebox is a complete web image gallery solution.
Use Juicebox to add full image galleries to your website, with no coding required.

To create a Juicebox gallery you can use our desktop application [JuiceboxBuilder](#), or you can use a [Juicebox Plugin](#) for Photoshop, Lightroom, WordPress, Picasa and more.

Installing JuiceboxBuilder

I use JuiceboxBuilder for the easiest way to create Juicebox galleries on your desktop.

To install JuiceboxBuilder, do this:

1. If you don't have it already, [download and install Adobe AIR](#).
2. Download and unzip Juicebox to your desktop. JuiceBox-Lite can be downloaded from [here](#).
3. Double-click the **JuiceboxBuilder.air** file in the download folder to install JuiceboxBuilder. Installation issues? [Check here to resolve](#).
4. Run the application to [build your first gallery](#).

Quick Start Video

Check out this quick video showing how to build your first Juicebox image gallery:
