

Terrarium TV or Mobdro

Install the **Terrarium TV APK** on your device to avoid the usage of **KODI add-ons**.
For sports or Live TV channels, you can try **Mobdro Live TV App**

TIPS (Thanks to the [Downloading Pirate](#))

To help the performance of Mobdro

from the homepage of the Firestick go to Settings, Applications, Manage Installed Applications, select Mobdro then Clear cache. This removes some of the data that builds up over time slowing you down.

A quick trick if you select a channel/stream and it skips.

Back out to close it then reopen it. I know, it sounds simple but I've been using this myself to make it play smoothly
